Attention!

Before using this product, read the RF Energy Exposure and Product Safety Guide that ships with the radio which contains instructions for safe usage and RF energy awareness and control for compliance with applicable standards and regulation.

Acoustic Safety

Exposure to loud noises from any source for extended periods of time may temporarily or permanently affect your hearing. The louder the radio volume, the less time is required before your hearing can be affected. Hearing damage from loud noise is sometimes undetectable at first and can have a cumulative effect. To protect your hearing:

- Use the lowest volume necessary to do your job.
- Turn up the volume only if you are in noisy surroundings.
- Turn down the volume before attaching headset or earpiece.
- Limit the amount of time you use headsets or earpieces at high volume.

- When using the radio without a headset or earpiece, do not place the radio speaker directly against your ear.

- If you experience hearing discomfort, ringing in your ears, or speech that is muffled, you should stop listening to your radio through your headset or earpiece, and have your hearing checked by your doctor.

To change the volume level, refer to Radio Product Safety Leaflet or CPS for Surveillance Kit Configurations.

Caution

Operation

- Turn off the device while attaching and detaching the earpiece.

Earpiece Overview

Table 1: Earpiece Overview and Description

Indicator	Description
1	Translucent Acoustic Tube (Replaceable)
2	Metal Clip
3	Push-to-Talk, Microphone and Programmable Button Module
